PROJECTS

Internship at Laboratoire Ondes et Matière D'Aquitaine, Talence — *Experimental Fluid Mechanics*

28 May 2025 - 10 July 2025

“Study of Unidirectional Gravity Waves at the Air-Water Interface in the Deep Water Regime”, under the supervision of E.Brasselet and E.Annenkova. Implementation of a python code for Background oriented Schlieren imaging.

Bibliographic Project, Talence — *Stokes Parameters*

February 2025 - May 2025

Bibliographic Project, Angers — *Quantum Computers*

November 2023 - May 2024

EDUCATION

Université Paris-Saclay, Orsay — *Licence 3 in Physics*

September 2025 - May 2026

Options : Applied Thermodynamics, Advanced Quantum Mechanics, Introduction to Solid State Physics and Special Relativity.

Université de Bordeaux, Talence — *Licence 2 in Physics*

September 2024 - May 2025

Deliberate choice to restart my second year of Licence in physics in order to consolidate and deepen my understanding of the fundamental concepts, ranked : 2/69 overall and 1st in Linear and Hermitian Algebra.

Université d'Angers, Angers — *Licence 1-2 in Physics & Chemistry*

September 2022 - May 2024

GOALS

-Master's degree in High Energy Physics, specifically I want to study QFT and QCD.

-PhD in High Energy Physics.

-Further develop expertise in theoretical physics and its mathematics.

SKILLS

Scientific english : partial study of Cornwell's Group theory in physics, Cohen-Tannoudji's Quantum Mechanics I & II,ourgoulhon's Special Relativity in General frames, The Classical Theory of Fields by Landau & Lifshitz.

Computer skills : LaTeX, Python, C programming, Word.

LANGUAGES

English - C1+ (Cambridge linguaskill test)

French - Native

Arabic - Native (9 years studied in Morocco)
